

Dealing with overplotting

```
>DFnorm<- data.frame(x=rnorm(3000), y=rnorm(32000))  
>p.norm <- ggplot(DFnorm, aes(x,y))  
>  
>p.norm + geom_point()
```

```
p.norm + geom_point(shape = 1)  
p.norm + geom_point(shape = ".")
```

Hollow Glyphs / Narrow Glyphs

The

Transparency (alpha blending)

```
>p.norm + geom_point(alpha=(0.25),colour="blue")  
>
```
